

1000 cranes project in Germany

13th July 2009

Dear students of the Hiroshima International school,

we´re pupils of the 9th class from Rehna which lies in the north of Germany.

In Physics lessons we had read the story about the girl Sadako and the thousand cranes. After that our teacher told us about your project we were very interested and decided to take part in it. Now we have our last school week and want to use the time to fold the thousand cranes. Some of us take pictures so that you can see how we work and some other create a website. We also make a poster for our school so that our pupils could see our project, too. We would be very pleased about a photo of our cranes on your monument. Maybe there will be some penfriendships between our and your school.

You can find the pictures and the e-mail addresses of our pupils at:

www.1000cranes.schule-rehna.de

Thank you for reading our letter.

Your sincerely pupils of the 9th class and our classteacher:

Jasmin Sanders

Jörg Upahl

Rebecca Steinert

Madleen Lübbert
